World Observation**DAY 1048**

Russia / Ukraine Conflict

Elon Musk & Donald Trump

Why it is said Donald Trump opens a new era for US and the world or may be even the universe? He is not just working alone, but with a special assistant Elon Musk. The former US president never had such an important assistant.

Donald Trump is the first US president that ranked into the top 500 richest people on earth. His latest ranking is 481th in this planet, overwhelmed the wealth of George Bush Junior and John Kennedy. According to the law, a president cannot decline his salary but can donate out. John Kennedy and Herbert Hoover donated their salary to charity boards, but Trump donated to government departments to lessen the deficit. The first and only president to do this. Trump is a famous merchant of making money and saving the expense, not only for his company but now for the whole US.

He is not the richest, but can get the richest people to help him. The position of Elon Musk is definitely more important than vice president. What is Elon Musk famous for, not just electric vehicle, he is a game changer and will launch out Full Self Driving (level 15) in 2026, and commercialize in 2027. Hence forward, people no need to get a driving license anymore, it is Elon Musk should try to get a license for Full Self Driving and end user just tell the car that I want to go to office, home, or gymnasium.....etc. Thus they can save a lot of time while the car is driving on their own, especially in long distance travelling, the user can write their dissertation or whatsoever..... Not only this, his robot will be commercialize soon, that in the near future, robots working in a company may be even more than human beings. His Space X reusable rocket will aim at Mars and not just this planet. Emigration to Mars is not a dream.

Once it was a Fantasy!

Now it is a furious March!

Will be a nice Ballade!

Market Observation

Touching the neckline

For the S&P on page 1, please refer to the chart on Jan 2nd (Thu) of this bulletin. Last week it was going to form a complete Head & Shoulders, now fully formed, and waiting for breakthrough. MACD also in a case of turning from Strong to weak. That means the risk of this week is definitely higher than previous week. Hang on ! Already said even Head & Shoulders is considered as the most accurate pattern among all patterns but still not 100%. Why? It has fake patterns and further development. NVDA (refer to page 6) is the best example, after breaking the neckline, it rebounded up and now even above all 5 major average lines, with strong MACD signals. It means that the Head & Shoulders is developing into a multi right shoulder pattern and may further transform to another pattern. Mind that on Jan 6th, 6:30pm he will deliver his speech in Las Vegas and let's see what would happen. On the other hand, the reverse Head & Shoulders of TSM (page 6) is now breaking upward which is a buying signal.

Even NASDAQ (page 1) has formed and Double Top but when touched the bottom line rebounded at once as NVDA. Therefore, the Double Top is transforming to another pattern and we have to watch whether it is a Descending triangle or Double Bottom.

So what should investor do? Can buy the QYLD (page 8). The dividend is paying out every month and you can use it for re-investment. It just have a great black candlestick of great fall and now a small white candlestick of rebound. The price is US\$18.39, but annual dividend of 2024 is US\$2.2772. So when times 2.2772 by 8, it is 18.2176. That means after 8 years you can nearly get back all your capital, and the rest inside the stock account is a total profit. So when you are in fear of the market will fall, just buy this stock, no need to see whether the price has gone up or not, just see how many dividend you can get every month. So the rise and fall of the market is none of your business. Even though it has ups and downs, but just buy it after a big black candlestick is the correct time. Mind that each brokerage firm has the right to collect charges on dividend, when in long-term case of 8 year, better check several firms to compare with the charges.

Is TSLA worthwhile to buy? When looking forward to the next few years, the development is excellent, especially Elon Musk is a superman. People said that AAPL will reach total value of 4 Trillion soon, but TSLA will be the first company that reaches 10 Trillion. However, the fluctuation is quite great indeed, for those that has heart disease or potential heart disease, do not touch it.
