California Great Fire

(3) Road to presidency

The California wildfires have now been identified as the most serious natural disaster in the history of the United States, surpassing the power of a magnitude 7 earthquake, but it is not over yet. The wind will become stronger and change direction within this week. Now it has reached a point where it is beyond rescue and cannot be extinguished.

When the fire first broke out, Governor Newsom was not on the scene in California to personally direct and deploy the work; instead, he flew to Ghana to attend the president's inauguration ceremony. Ghana is just a small country in Africa, and Newsom is neither the Secretary of State nor the Secretary of Foreign Affairs. Why would he do this? There are three main sources of American presidents: senators, vice presidents or governors. The governor intends to run in the 2028 election to compete against Trump's chosen successor. In order to follow the DEI trend, he attended the inauguration of a black president to show his stance, rather than choosing the traditional white inauguration; therefore, even the largest wildfire in history was ignored.

In 2002, Chechen terrorists and Black Widows stormed a Moscow theater and took hostages, demanding that Russia withdraw its troops. Putin was supposed to attend the APEC summit in Mexico the next day, but he canceled his trip because he had to personally direct and handle this serious incident. This was the first time that APEC had the head of a major country was absent. The conference also characterized the incident as a terrorist attack and issued a statement condemning it. At that time, each Black Widow held a remote control in his hand. If special forces broke in, they would immediately detonate the entire theater and die together. As a result, Putin used poison gas to anesthetize the Black Widow with a remote-controlled detonator, but many hostages died due to overdose. In the end, most of the hostages were rescued, and the terrorists were either shot dead or captured. Afterwards, people asked Putin to disclose the structure of the poison gas, but he refused to do so for fear that it would be abused by terrorists. Many years later, the formula was finally made public, and it is the famous fentanyl. Therefore, it is even more justified for Trump to eliminate DEI and fentanyl now. He is not just starting a new presidential term, but is leading the United States into another era and awakening from the awakening culture.
