S&P popped up above 5 major average lines, mind that MACD forest bar changed from negative to positive and %K and %D had golden intersection. Last closing 5996. Under 6000. Is it worthwhile to buy?

NASDAQ popped up even weaker than S&P. Last closing 19630. Under 20000. Is it worthwhile to buy?

There is a presidential office in Senate of Capitol Hill. After the swearing in at 12:00 noon of inauguration ceremony, national lunch and sending off the former president Biden, Trump will immediately sign nearly 100 administrative orders in that office and they be will effective at once. Then he will walk back through Pennsylvania Avenue to White House as other presidents did. *In 2017, he walked back through Pennsylvania Avenue and signed appointment letter to his cabinet to let them become legal staff, at that time was nearly five. The next day was Saturday, he visited house of seniors. On Monday he phoned to Mexican president as promised to talk about the Mexican Wall.*

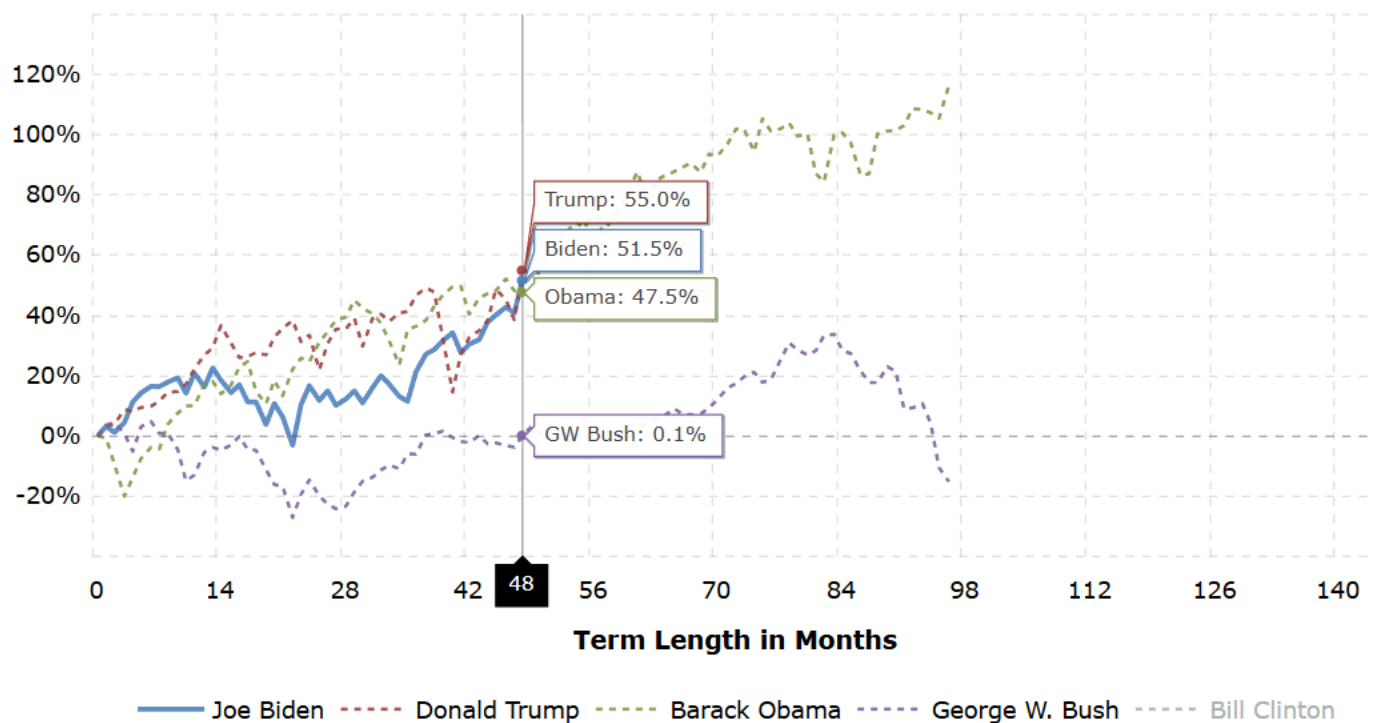

Donald Trump 2.0

- (1) He already sent special envoy to help the special envoy of Biden for the ceasefire talk of Israel and Hamas to make release of hostage on Sunday, one day before his inauguration.
- (2) Ukraine already accepted to give up part of the land in order to end the war for US no longer support them.
- (3) Levy 25% tariff on Canada and Mexico on first day, and China 10% first gradually increase up but still will negotiation.
- (4) Continue to tighten the sanction of chips of Biden and severely cut all transfer through other countries to sanction countries.
- (5) Sweep fentanyl usage and ban imports.
- (6) Cut all DEI education in schools and colleges.
- (7) Cancel all WOKE culture in large enterprise and make US go back to normal.
- (8) Add one more invisible post above the vice-president, which is Elon Musk, a *de facto* personal assistant to president. *The actual Number Two of US.*
- (9) Special development by his personal assistant on AI, Full Self Driving, Robot in shape of human, Space Industry and practical usage chips.
- (10) Extent power to Greenland, Panama Canal, Canada to overwhelm the Belt and Road of China.
- (11) Selling of arms to Taiwan will be of highest monetary value within 4 years.
- (12) Reconstruction of California after Great Fire.
- (13) Increase oil production to push down price of petroleum.
- (14) Cut allowance to electric cars on first day.
- (15) Tax cut from 21% to 15%.
- (16) Issued \$Trump 2 days before inauguration, the first leader in the world that has his own crypto.

Stock Market Performance by President (From Election Date)

<https://www.macrotrends.net/2613/stock-market-performance-by-president-from-election-date>

North East West South is NEWS

Jeff Bezos' Blue Origin's newly developed New Glenn rocket finally successfully completed its first flight recently. This 320-foot-tall launch vehicle is expected to directly compete with SpaceX's Falcon Heavy and bring more choices to customers.

The World Bank said that if the United States imposes a 10% tariff on its trading partners, global growth will decline.

North Korea stole more than \$650 million in cryptocurrency last year, and the United States, Japan and South Korea issued a joint warning.

The U.S. government may only need four years to break its post-World War II record debt, the Congressional Budget Office (CBO) warned on Friday, even as it cut its deficit forecast for the next decade.

TikTok has gone offline in the US, hours before a new law banning the platform was due to come into effect.

World Observation

DAY 1061

Russia / Ukraine Conflict

California Great Fire

(5) Shortage of Water

When BBC reporters had interview with the residents, they said that they were surprised to see only 2 or 3 fire-fighting planes were in the sky for they expect there should be 20 or 30 in such a great fire. They should fly up team by team, incessantly one by one in non-stopping array as military show. During an exhibition, air show or military parade, a lot of planes are on the sky, but when in most need, only 2 or 3 can be seen. Even if fire department is in shortage, why they do not ask help from the military force? Or they can ask help from Canada for they also have abundant experience in fighting wild fires.

Even if California is in shortage, it can be deployed from other neighborhood states easily. But what news said was that there was an unmanned flying plane in the sky and made obstacle to fire-fighting planes. Those that should fly up could not see, those should not fly up can be seen. Is this the third world or G7 countries? California had been long in WOKE culture which is the prerequisite and all others things are put aside. So where are those fire-fighting plane? No fuel? No water? No chemical? No explanations.

During the era of Donald Trump 1.0, he already said that there is great shortage of water in California and should build large reservoirs for usage of firefighting and daily drinking water. But the plan had not yet started even today is Trump 2.0 era. For all priority were given to DEI. Everything should pick up people from the black, Muslim, transsexual to do it no matter they are qualified or not. Therefore people that do not have enough experience in firefighting are assigned to run the Fire Department as all other departments are in same position. The qualified and the original white became second class citizens and workers. Third class official hold all positions and that is why California is among the third world even they possess the Silicon Valley.

Market Observation

Official Trump
\$ 73.08

Is it worthwhile to buy now?

Please refer to The Express of Jan 13th and 14th, the jumping gap of S&P started on Nov the winning of General Election of Donald Trump and formed an unsuccessful Head & Shoulders. Already said numerous times even Head & Shoulders are considered as the most accurate pattern but does not mean 100% accurate. (Please refer to the Handbook for further details). The gap started at S&P 5783, but on Jan 13th market refilled and opened at 5782. The writer purchased VOO at market opening. Why?

Statistic shown that since the introduction of S&P in 1957, the average annual return of S&P is 10.5%. In 2023, it is 26.3%, and 2024 is 23.31%. (See page 4) After the great growth of 2023 and 2024, this year is expect to have a slower growth, but because of high development in AI, the average growth of 10.5% is also expected. For NASDAQ since the introduction in 1983, the average growth is 10.4%. But if we view the S&P since 1983, the average growth is just 7.9%. Of course there are still other calculations.

Let's take the majority, most people expected S&P will go up to 6,600 as the highest point of this year. Therefore when under 6,000 is still worthwhile to buy. From 6,000 to 6,300 is a grey area, should only buy for short term. When over 6,300 ready to take profit gradually, but better keep up with the Fear & Greed Index. But it does not mean it would not go down. The lowest point of 2025 is expected to be at 5557, that is when Head & Shoulders have a breakthrough, it will reach that level. Therefore from 5557 to 5783 is the lower grey area of buying. Even it has been reached on Jan 13th, but still too early, we still have eleven and a half month to go. No one knows whether it will touch again.

Multi-right shoulders of Head & Shoulders are very likely to be transformed into other patterns. The Head & Shoulders Pattern of NVDA had already transformed into Double Top, but NVDA is still going up when facing another sanction Biden and investigation of China of monopoly of NVDA. For the demand is still quite great. Today is market holiday of Martin Luther King, therefore we still have time to talk about which stocks worthwhile to buy, which are not worthwhile tomorrow before market opening of Donald Trump 2.0.
