World Observation

DAY 1112

Russia / Ukraine Conflict

European Union 2.0

(2) Information Warfare

The Unemployment Rate of EU is 5.8%, UK is 4.4% and US is 4.1% the lowest in western countries. What should they do now? How to improve the Unemployment Rate? One thing is to start the information warfare.

In the US, King Donald has his Truth Social and X of Elon Musk to work for him. However, in this term of 2.0, it is found that a lot of figures are incorrect and misleading, some of them even so far away from facts, and the difference is as far as sky and earth. It is really like countries of dictatorship. Of course, currently media now always have fact check to tell which is right or which is wrong, but practically, most people were captured by first ideas. It is not easy to change afterwards. That is when lies were told for hundred times would be considered as truth.

China also have a lot of keyboard fighter to carry out their messages or even use robot account. The EU should learn from King Donald and keyboard fighters to carry out their ideology. Thus can improve the unemployment rate by keyboard fighters. If they want to launch out a large project to save the economy, it may take a longer time to establish office and plan for it, but they can employment keyboard fighters can work from home and start working at once as free-lance workers. They can also employ by 50 cents Euro which is practically an effective way of doing propaganda.

As far as I can see, few people were aware of the silent reformation of the EU, or not even know of the existence, so they would not know how important it is. Keyboard fighters of China always talk about how strong their aircraft carriers are and the EU also have the right to talk about their nuclear aircraft carriers *Charles de Gaulle* and others. What the EU needs is to let the world know of their ambition and ideology so they can do more with less. They need worldwide support first, thus funding and spiritual support will come automatically. The EU should learn from the IBM (International Big Mouth) of King Donald and keyboard fighters of China at once.
