World Observation

Day 1115
Russia/Ukraine Conflict

European Union 2.0

(5) Police of the World

King Donald should be the richest president of the world. His rank is 481 in the FORBES richest persons of the world. He surely is a successful merchant. Actually, anyone listed among the top 500 in Forbes are all successful merchants. So what King Donald do now in his second term is aiming at earning money only. He is going to withdraw from the position of World Police for he does not want to spend so much on arms since it cannot earn money directly.

Who will take up such a position? EU, UK and China are having such intentions. Who is strong enough to give peace to Ukraine now and after the ceasefire will be the police of the world. When the ceasefire of Ukraine can come true, there will be a joint troop protecting on the backline of Ukraine, such as western area and around Kyiv. When in the frontline, it will be on the borderline of Poland, directly touching Russia.

The EU is going to establish a military force with allies and jointly supported by the UK, Canada and Japan. Such a union no matter in technology and military can overcome Russia, but still need the information of US. That is all their military actions still need the consent of US, such as supplying information of Starlink. However, for such an information they can collect handling fees.

The weapons of EU and the allies can fight against Russia, but still a little lower than US, so they still can buy or need to buy from US. The main points lies on the production line of arms. EU need to strengthen their arms and have reorganization, but it will take time, the shortcut is to buy from US for their level really is higher than EU at least one grade, but this is not the major point. King Donald must get enough profit or else he would not supply information. What he wants is not just handling fees for information, but double, triple, quadruple..... 10 or 20 times more than that.
