North East West South is NEWS

Tesla said it will launch its smart driving assistance features in China after obtaining regulatory approval, after it said the limited-time free trial of its Full Self-Driving Service (FSD) had been suspended.

Tesla's electric vehicle sales in Europe in February lagged behind those of traditional brands Volkswagen and BMW. Electric vehicle sales in 25 EU markets, the UK, Norway and Switzerland were less than 16,000 in February, a year-on-year average decline of 44%. Market share fell to 9.6% during the month, the worst monthly performance in five years.

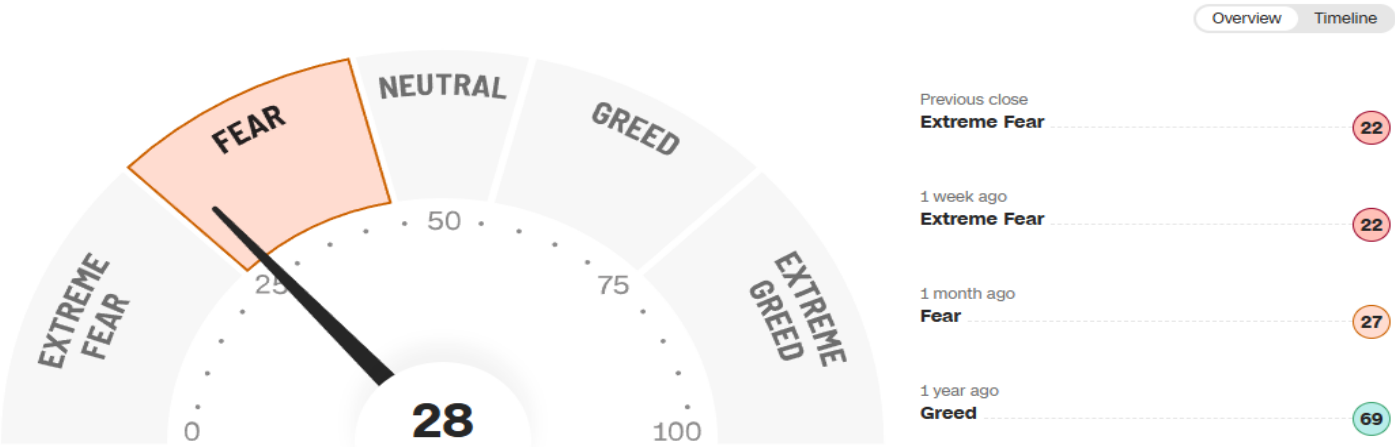

China recently unveiled a powerful device capable of cutting undersea cables. The technology's potential for dual-use in military and civilian applications could have potential strategic implications for global communications networks and maritime security.

Long-term research by the University of Michigan in the United States shows that human intelligence has been on a downward trend since it peaked in the mid-2010s. The popularization of digital media and the Internet has changed the way people receive information, from traditional text reading to short videos, eroding people's ability to concentrate.

A day after the US delegation held talks with the Ukrainian delegation in Riyadh, the capital of Saudi Arabia, it held talks with the Russian delegation to seek a maritime ceasefire in the Black Sea.

World Observation

Day 1126
Russia/Ukraine Conflict

Humanoid Robot

Elon Musk turned up in the grand employee meeting of Tesla, announcing good news that this year they will manufacture 5,000 humanoid robot named Optimus and in 2026 will be 50,000 units, within 3 years will reach 500,000 units. In 2029, Optimus may land on the Mars by Starship. The background of announcement is that Tesla is facing keen competition and the sales is dropping in Europe but still with slight rise in China. However, the Full Self Driving project has just approved by China, but one week later, they suspended it.

Therefore Elon Musk stood up to give good news and asked employees continue to hold the stocks and do not sell during the downtrend. The price of Tesla rebounded nearly 10%. After Elon Musk shown his electric saw to cut the budget of government department, he was blamed very much and at length he said that he would get off the Department of DOGE in about one year's time. For when he was involved in the government service of White House, people thought he would give up his business and the stock price of Tesla dropped dramatically.

In the 1960s, before Soviet Union and US sent astronauts to space, they send monkey into space first. Now Elon Musk will send humanoid robot instead of monkey. But the problem aroused in 2040, there will be 10 billion humanoid robot on earth which is more than human beings. What the world will be? It is not just a problem of raising unemployment rate, but will be a struggle between human being and robot.

As in the short term, Tesla is facing competition from Nvidia, Google, Apple, and Amazon which are keen competitors of high caliber. Those from China is chasing after even though still a distance but cannot be neglected. Hota Industrial Mfg of Taiwan is invited to join the supply chain of Optimus in the landing of Mars project. Thus investors can view this from both long term and short term scene. Please get ready to face the era of robots.
