### North East West South is NEWS

International credit rating agency Moody's announced that it would downgrade the US credit rating due to the continued rise in US government debt. The United States lost its last top 3A rating from a major credit rating agency, dealing a blow to President Trump's narrative of economic strength and prosperity.

The heads of state of Ukraine, France, Germany, Britain and Poland held a telephone conference with U.S. President Donald Trump, a spokesman for Ukrainian President Volodymyr Zelensky said after Russian and Ukrainian officials concluded talks in Istanbul, Turkey.

A cross-party group of Japanese lawmakers recently jointly submitted a proposal calling on the Japanese Ministry of Defense to set up a dedicated department to deal with airspace security threats related to unidentified flying objects (UFOs).

US President Trump said that the United States will unilaterally set tariff rates for many trading partners in the next two to three weeks, and will definitely retain the 10% base rate. They will discuss it again when they are not expecting it.

British media revealed that the video released by Pakistan showing the shooting down of an Indian fighter jet was from the computer game Battle Dragon, and there was no actual tail number or wreckage to show.

World Observation

Day 1181 Russia/Ukraine Conflict

# The Wealthiest US president

Donald Trump is the wealthiest US president ever in history. His net wealth is US\$7.2 billion in 2025, ranking 481 in the world. He is the only US president rank among the top 500 of the world. We can say these 500 are all supermen in earning money. So let's see how he runs the presidency with his commercial method.

He owns the Trump Organization which has 11 Trump International Hotel in the world including New York, Chicago, Washington DC, Las Vegas and Virginia; when outside 2 hotels in Scotland one in Ireland and one in Vancouver. The headquarter is in Fifth Avenue of New York which is the Trump International Building. For investors that had been to Wall Street would find a Trump Tower in number 40, once it was the tallest building of the world. Few people know about it before he won his presidency. After 2016, everyone that goes to Wall Street can find a new scenic spot besides the Stock Exchange and first Federal Hall.

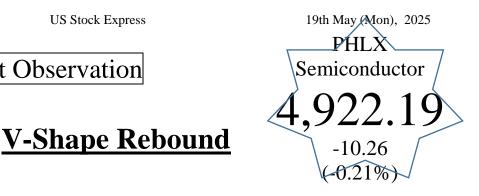

So is he a successful merchant? His Trump Organization had gone bankruptcy for 6 times, but still rise again. Is it 6 failures or 6 rises? Anyway Trump himself had not file for bankruptcy, it's just his Trump Organization.

So what's his difference with Joe Biden? Let's see the B3W (Build Back Better World) project. It's a project against the Belt and Road Project of China. China give out great amount of money and development project to the third world so as to get greater support, Biden united with G7 to give out help and development project. China use Chinese workers so as to improve the unemployment rate of China, but G7 to local workers so as to develop the third world. G7 has strict monitoring on expenses so as to prevent corruption, but China let the leaders use freely so leaders would stick to China only. Anyway, both G7 and China are giving out money.

Trump went to Middle East and earn back a lot of money. There is no need for him go give out money, instead he can earn for his country. There are purchasing orders from Saudi of US\$1.2 Trillion from Qatar \$1.0 Trillion, \$243.5 Billion from UAE. Can also earn a Flying Palace of \$400m as Air Force One. CEO of Tesla, Nvidia, AMD also went with him to earn money. He himself is going to establish a new Trump International Tower which has the highest outdoor swimming pool in Dubai to earn money for Trump Organization. But remember he has filed for bankruptcy for 6 times that means his policies are so controversial. The paths are not stracight and plain, just hope he can overcome as in the past 6 times.

The market is in a typical V-Shape Rebound as that of Covid in 2020, Financial Tsunami of 2008 and Terror Attack of 2001. Now S&P is prominently standing above all 5 major average lines. It is done by repurchasing of the enterprises. The previous week, Trump said that he would have something very important to announce beyond the tariff. That is his trip to Middle East earn a lot of money for his country.

Important CEO went with him, including Jenson Huang of NVDA, Elon Musk of TSLA and Lisa Su of AMD. These stocks can be held no matter for short, medium or long term. Market has a jumping gap after the Swiss talk and then further upward after Trump's visit to Middle East.

Trump is a market mover, his family should earn a lot from stocks recently. Please be remember, the characteristic of US stocks is bull slow and long, but bear short and quick. The rise will be slow and long, better set a target such as at Landing of the Mars like 2029 or 2030. The path is no so plain, would have a lot of ups and downs. The period of buying this year, now can extend to 9 months. The effect of tariff not yet come out, may be seen in autumn or winter. There are 90 days talk for the 75 countries and 90 days for China. But Trump said he would go to visit China. Interest rate will become market focus again.

The basic strategy is that when S&P is near or under the 250-SMA, it is the best time of buying, for most of the time US stocks are running above this line.
