Since Warren Buffet announced retirement in early May, BRK.W started to drop and ARKW started to rise, already said this trend will continue and now is still going on. For when Buffet (God of Stocks) steps down, Cathy Wood (Goddess of Stocks) is invincible no matter who will be the successor of Buffet. Cathy Wood just purchased a lot of crypto and stable coin.

Remember Mars will not appear in the sky this time and that's why nobody in the market is willing to talk about Landing on Mars and related stocks except The Express and those who really know what's beyond the earth.

Where & when to see planetary alignment today?

The large planetary alignment will be visible in the mornings around August 10, 2025: **start looking about an hour before sunrise**. Some locations will have better viewing conditions as the planets rise higher above the horizon. Mercury will be favoring southern latitudes.

Note that **August 10, 2025** is a median date based on when this event will be well visible for most locations around the world. The perfect date to view the alignment may vary depending on your location.

Below are the selected locations and dates when the planets will be visible in the smallest sector of the sky during this alignment, along with the altitude of the lowest planet, Mercury, during the nautical twilight.

- Abu Dhabi: **August 9**, 161-degree sky sector, altitude 6°;
- Athens: **August 10**, 146-degree sky sector, altitude 5°;
- Beijing: **August 10**, 144-degree sky sector, altitude 4°;
- Berlin: **August 10**, 135-degree sky sector, altitude 2°;
- London: **August 10**, 136-degree sky sector, altitude 2°;
- New York: **August 10**, 144-degree sky sector, altitude 4°;
- Tokyo: **August 10**, 148-degree sky sector, altitude 5°;
- Bombay: **August 11**, 170-degree sky sector, altitude 7°;
- Hong Kong: **August 11**, 164-degree sky sector, altitude 7°;
- Mexico: **August 11**, 169-degree sky sector, altitude 7°;
- Reykjavík: **August 12**, 129-degree sky sector, altitude 1° (during civil twilight);
- São Paulo: **August 12**, 141-degree sky sector, altitude 4°;
- Sydney: **August 12**, 134-degree sky sector, altitude 5°;

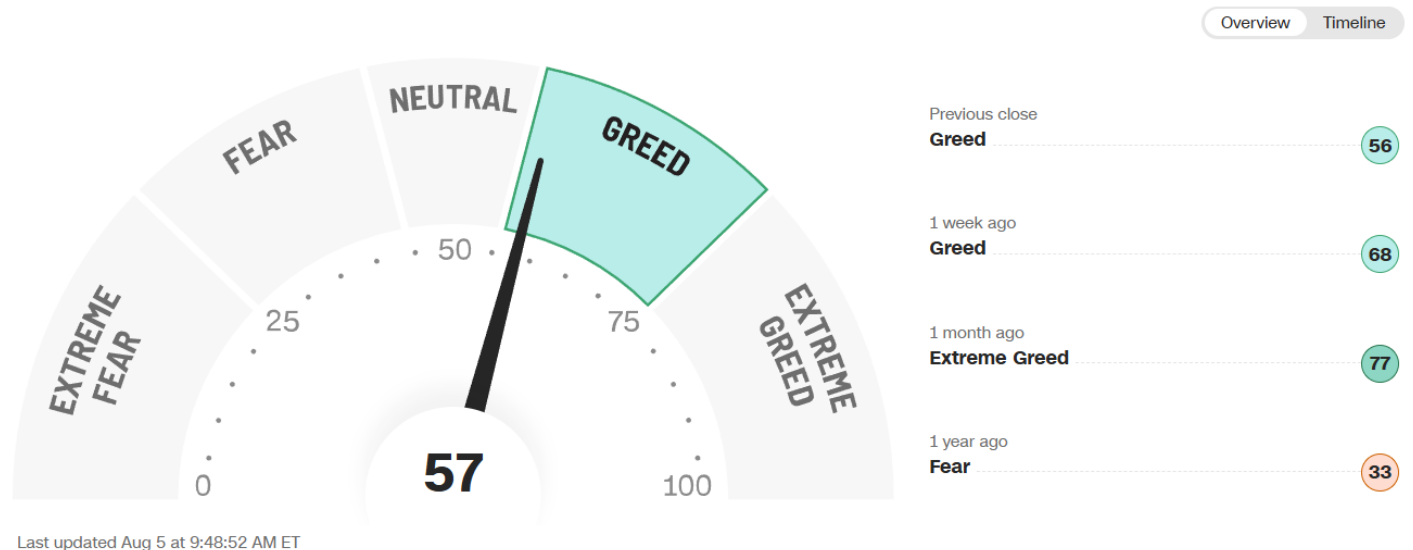

Note that tall buildings or high mountains near you might hide the planets from view.

	Planet	Magnitude	Visibility	Constellation
	Venus	-3.9		 Gemini
	Jupiter	-1.9		 Gemini
	Saturn	0.7		 Pisces
	Mercury	1.9		 Cancer
	Uranus	5.7		 Taurus
	Neptune	7.8		 Pisces

North East West South is NEWS

According to a recent report by cryptocurrency analyst Fred Krueger, the United States currently holds approximately 8 million Bitcoins, representing 40% of the global circulating supply. Assuming each Bitcoin is valued at \$120,000, the total asset value reaches \$936 billion.

TSMC, the world's leading chip foundry, has been the subject of a major technology leak. Several former employees are suspected of illegally obtaining confidential 2nm process technology while employed at TSMC. The leaked information was provided to equipment engineers at Tokyo Electron. Three engineers are currently under investigation by prosecutors. The case has been elevated to a national security level.

The U.S. State Department announced today that, to prevent foreign nationals from overstaying their visas, it will implement a pilot program starting later this month requiring some visa applicants to post a deposit of up to \$15,000 before entering the country.

The U.S. trade deficit narrowed 16% to \$60.2 billion in June due to a sharp decline in consumer goods imports. The market had originally estimated a trade deficit of \$61.3 billion. U.S. exports narrowed their decline to 0.5% in June after a 4.1% drop in May. Imports fell 3.7% in June after a 0.1% drop in May.

A month after a wildfire broke out on the rim of the Grand Canyon, firefighters continued their efforts today to contain the blaze. The fire, sparked by a lightning strike on July 4th, which coincided with Independence Day, quickly spread to the North Rim of the Grand Canyon. The Dragon Bravo Fire was initially allowed to burn as part of a natural cycle, reducing vegetation and promoting landscape renewal.

World Observation

Day 1261
Russia/Ukraine Conflict

Tariff War

(3) Rare earth

Now there is only one country which had no compromise with US in tariff. It is China the largest economy just after US on earth. Their battlefield is on rare earth. China wants semiconductor from US and US wants rare earth from China.

China is the world's largest processor of rare earth elements for a variety of industries, including electric vehicles (EVs), wind turbines, magnets, consumer electronics and other clean energy technologies. Especially in national defense industry, it is the throat. Even the mineral reserve in China is just 60%, but the processing is 95% of the world. For in other countries they are bounded by pollution law for it would make underground water in great pollution for a long time.

Brazil, India, Malaysia, Australia, Ukraine and Myanmar all have reserve in rare earth. Now an Australian company just agreed to have processing in Malaysia. Ukraine agreed to share all the minerals including rare earth with US, but will be done after the war and not at once. US wants to have processing in Myanmar, but China is in support with the Myanmar military government and US in support with Burma, the anti-government force. If US gives weapons to the military government, they will be blamed by the whole world. If US fully supports the anti-government force, it will become a Proxy War. That is to fight with China indirectly through the government force and anti-government force.

US is trying to find alternatives of rare earth including production and processing, but it will take years. Now they still rely on China to a great extent. China is also in trouble with sanction of semiconductors, but they still can get from transferring through the 3rd, 4th and 5th countries. However, US Senate is proposing a law that all chips should be installed with a GPS system and if they are shipped to sanction places will be turned off function at once. Basically, the technical problems are solved. So we have to watch the Final Curtain and see how it shows!!!
