North East West South is NEWS

US President Trump's state visit to the UK has already prompted US tech giants to pledge investments to support the UK's artificial intelligence (AI) industry, with the total investment estimated at approximately \$42 billion. The two governments also reached a "Tech Prosperity Deal," agreeing to cooperate in areas such as nuclear and space technology.

US President Trump's high tariffs continue to take their toll. Preliminary trade statistics released today by Japan's Ministry of Finance show that Japan's exports to the US fell 13.8% in August compared to the same period last year, with auto shipments also down by more than a quarter.

Disney, Warner Bros. Discovery, and Universal Pictures, three major US film and television companies, jointly filed a lawsuit against MiniMax, a Chinese artificial intelligence (AI) company, in a Los Angeles federal court today, accusing the company of massive copyright infringement and profiting from the use of unauthorized well-known film characters in AI training and film generation.

The Financial Times, citing sources familiar with the matter, reported that Chinese internet regulators have ordered companies including Alibaba and ByteDance to halt purchases of Nvidia's RTX Pro 6000D chips.

The Bank of Canada today reduced its target for the overnight rate by 25 basis points to 2.5%, with the Bank Rate at 2.75% and the deposit rate at 2.45%.

Ideal buying level of TSLA is \$367

ROBO is not a company—it's an ETF (Exchange-Traded Fund) called the ROBO Global Robotics & Automation Index ETF. It's designed to give investors exposure to the global robotics, automation, and AI ecosystem, and it's one of the most diversified ways to invest in the Fourth Industrial Revolution.

Microsoft Copilot AI

What Is ROBO All About?

- . Focus: Invests in companies driving innovation in robotics, automation, and Al
- Holdings: ~87 companies across industrials, tech, and healthcare sectors
- Top Holdings include:
 - Symbotic (warehouse robotics)
 - Ambarella (Al semiconductors)
 - Teradyne (test automation)
 - AutoStore (automated storage systems)
 - Fanuc, Daifuku, Hon Hai (Asian robotics giants) 1

ROBO targets **small- and mid-cap innovators**, not just megacaps like Nvidia or Tesla. That gives it exposure to **early-stage growth** and **global diversity**.

Outlook & Development

ROBO is riding several megatrends:

- Al + Robotics convergence: From autonomous factories to surgical robots
- Labor shortages: Driving demand for automation in logistics and manufacturing
- Healthcare robotics: Precision surgery, diagnostics, and elderly care
- Global adoption: Strong exposure to Japan, Taiwan, and Europe

In Q3 2024, ROBO returned **+5.6%**, with standout gains from companies like Omnicell (+58.9%) 2. Analysts expect continued growth as AI infrastructure spending surpasses **\$100B by 2028** 3.

X ROBO vs. Rivals

ETF	Focus	AUM	Expense Ratio	5-Year Return
ROBO	Robotics & Automation	\$1.12B	0.95%	+35.2% 4
вотх	Robotics & AI	\$2.85B	0.68%	+24.7% 4
THNQ	AI & Cognitive Computing	\$253M	0.68%	+86.4% 4
ROBT	Nasdaq Robotics & Al	\$566M	0.65%	+30.8% 4

ROBO is more **diversified** and **global**, while BOTZ is more concentrated in megacaps like Nvidia. THNQ has higher returns but is more volatile.

Price Forecast (2025-2030)

Year	Forecast Price Range	Notes	
2025	\$44 - \$67.75	Potential pullback due to valuation 5	
2026	\$60 - \$72	Recovery with AI adoption acceleration	
2027	\$65 - \$78	Robotics demand in healthcare/logistics	
2028	\$68 - \$82	Global automation boom	
2029	\$70 - \$85	AI + robotics convergence peak	
2030	\$69.42 avg	Long-term bullish trend 5	

Current price: ~\$64.71. Analysts expect modest growth in 2025, then stronger upside through 2030.

When Should You Buy?

ROBO is **not cheap** right now, but it's not overheated either. Here's a smart entry strategy:

- Buy zone: \$58-\$61 range (10% below current price)
- Accumulation strategy: Dollar-cost averaging over the next 6-12 months
- Avoid missing out: If it dips below \$60, that's historically a strong support level 6

World Observation

Day 1303 Russia/Ukraine Conflict

Riding the AI Waves (23) TSLA, TSLA & TSLA

The previous high of TSLA is \$488, so if you enter in current price which is around \$420, you will meet the resistance at \$488, the room for profit is just \$68. But when the support is at \$367, the down side is \$53 only, but the symmetric triangle takes a period from June to August to form which is 3 months and firm enough for supporting.

Some people said short term trading can get most benefits but some said long term. So investors can have an experiment of opening 2 accounts, one for short term and another for long term. But if you only have limited capital, you can use the short term for real trading, and long term for mock trading which just mark down with a pen where you had purchased and take profit. But you cannot do the other way round.

The is not feasible if you use the long term account for real trading but short term account just for mock trading. For in mock trading of short term you can earn a lot, but when you go to real trading you would lose a lot. For short term has a lot of fluctuations and not every one can bear even if there is a winning formula.

That is if you aim is in 10 years according to the pay and performance scheme of Elon Musk, you can buy TSLA at any price. For when covering a period of 10 years, those daily fluctuations are nothing at all. But if you think \$488 or \$500 seemed to be resistance, or afraid of selling on good news when rate cut comes, better try to buy at lower levels showed yesterday. Another method is to use your monthly income to buy gradually every month no matter what price is, just fix a day say 1st of every month. When you keep on buying for 10 years, you can get a surprising reward.

Market Observation

ROBO

If ORCL can take part in purchasing TikTok, it will be treated as another NVDA, meanwhile, AVGO is said to be another NVDA, TSM also has the same name. Please treat these sayings as beautiful adjectives rather than a plan, progress or forecast.

Now most famous stocks are all near record high, even non famous stocks are the same. Some youngsters wish to buy small stocks under \$100 so that they can be easily go up.

Anyway, we are in the great trend of AI and should put this in mind. The market is at high no matter what stock you are buying are facing risk or correction. Please study the analysis of AI and decide at what level you should enter. Do forgot Donald Trump is in favor of weak dollar policy.
