When Donald Trump gave his 48-hour ultimatum on Friday, Elon Musk announced his project of “Terafab” on Saturday, saying the universe is so enormous, the sun occupies 98% of mass in solar system, why we are having so much disputes on earth. He is developing the largest solar energy project, let’s response with improving your personal luck by solar calendar of Geomancy in our training course, rather than aiming at meaningless human disputes on this or that location on earth. The earth is just a tiny dot in solar system. The solar system is just a tiny dot in Milky Way. The Milky Way is just a tiny dot ..... So, forget all those disputes and improve your own luck first.

# Fear & Greed Index

What emotion is driving the market now?

[Learn more about the index](#)

Last updated Mar 31 at 11:19:34 AM ET

Oil prices formed a rising hammer upward, but 3 major indexes also rebounded upward for chance of peace talk.

## World Observation

Day 1498  
Russia/Ukraine Conflict

# Chance of Peace : 60%

Donald Trump said the peace talk is in good progress, but Iran said talk had not yet begun. It may be an art of deal. Actually, indirect talk through a middleman is also a means of negotiation, or maybe the other side insists on a face to face talk not yet started. Trump said he is talking to a higher level which holds actual power. People may also ask if you are sure you are talking to the right man.

The response of Trump is that Iran had sent him a great gift which is to let go 10 tankers through the Hormuz Strait, showing that the negotiator is the right man that holds the power of the waterway. Trump had not disclosed the name of the representative lest he would be assassinated by their own extremists, just saying that the internet of Iran had been out of action for a month, so that their internal communications are very poor and incorrect.

The Congress in Iran has passed a bill that they can levy a passing fee of US\$2 million for ships passing by. When this comes true, that means all other channels in the world can also do it, such as the English Channel, Baltic Sea, Black Sea, Mediterranean Sea, South Sea .....etc, especially in the South Sea, several countries claimed they have the sovereignty right, that is Vietnam, Malaysia, The Philippines, Timor and China. Does it mean a single commercial ship needs to pay a passing fee to all of them when passing the South Sea. That is the focus now is in the passing fee and not whatsoever 15 points of US or 6 points of Iran. Does it mean goes back to Jungle Law, what is the use of United Nations?

Trump said that if negotiation failed by the deadline, he would launch an attack of Hell Fire. For Marine Corps, Airborne Units, Special Forces are all ready and passed the Combat Test before sending them to the frontline. An invincible force not only needs strongest and precise firepower, but should mind both hardware and

software. That is besides the supply chain, must care for psychological needs of soldiers.

As said yesterday, the USS Tripoli (LHA7) would only stay in the Middle East for 14 days, not because of the supply chain. They have full logistic ships to back up. Special Forces like Delta or Airborne Brigade, they are full of risk. The comrade that talked with you last night may suddenly passed away in the morning fight. In a special force, of course some are trained to go in the foremost position, but some are trained to guard the rearmost position, so the whole group need not fear enemies at the back. But if someone in the rearmost is dead, that would make the whole group unhappy and fear attacks from the back always. Therefore, those special forces would only stay on the battlefield for 14 days, so they can always fight with their highest spirit and no need to lament the sacrifice of comrades so much. Therefore 14 days after, the USS Boxer (LHD4) with fully loaded munition and high spirit personnel would replace the USS Tripoli (LHA7) for their mission. While a normal aircraft carrier would also stay for 3 months only and another strike group will arrive to replace it so as to eliminate their nostalgia.

If the US wants to be the leader of the world, they must keep the Hormuz Strait free or under their control. When they think it is too far and none of his business, then no need to fight for Ukraine, Israel or no need to sell arms to these and other countries. If the US has no power to press down and keep the water free, who can? If just by negotiations, it has been started since 2006, how many 20 years can a negotiation last for? Forever talking without caring what is happening? What for?

So how is the chance of success by negotiation? At this stage it is just 60%. One more thing to keep in mind is that, the golden pit of last year is on April 7 2025 which is the year-low. This time is very likely to be again in April. Most of the time, 3 major indexes are running above the 250-SMA, so when under it, it is really a good chance to buy at a dip. But no need to be in a hurry, the deadline is April 6. Anyway, please look beyond the war, up above the sky there is another project of Artemis II, it will last for several decades, and the war surely will be over one day, but the Artemis would not end even after decades. For Space Industry Stocks, please refer to The Express of 20230326 and study them one by one.
