Market Observation

Day	1528
Russia/Ukraine Conflict	

How to find out Stars of tomorrow?

The anti-war sentiment in the US probably is the strongest in the world. They want their country to be the most powerful and bearing the status of international police, but on the other hand, they do not want to have so much loss of life and do not want to suffer inflation because of fighting for a war thousand miles away. This is a contradictory sentiment of general citizens in the US. The quick victory in the 1991 Gulf War and 2003 Iraq War was due to sending a large amount of ground force but in 2026 the Iranian war only precise attack by guided missile and smart bombs without any ground force.

The greatest difference this time is that Iran holds the throat of Hormuz Strait but Trump at length found out the method to use a soft method to make them collapse, that is to have total blockade of Iranian ports. Market response is that petroleum price surely will go up but stock indices also went up. S&P and NASDAQ on record high, DJIA near record high, even the 4th index PHLX is on record high also. Why? Investors thought the war should not last too long! Which side will collapse first? It is written on the wall.

Why do people say the stock market is sensitive? For it talks about the future in advance! Experienced investors always like to say the stock market is running 6 to 9 months ahead of the economy. Of course, it is impossible to find out a 1 to 1 ratio exactly like that! But if we view from the big picture, the bottom of Liberation Day of 2025 is on April 7th, by the end of the year, most people had a feeling of too many potential stocks needed to buy, but too little cash left in hand. We can say such a saying is roughly correct. Now the bottom is seen on March 30th 2026, we can expect another bloom in the second half of this year. What investors need to do is not to count the days in a day-by-day ratio, rather it can likely be understood as quarter by quarter.

According to Chinese Geomancy, the year 2026 and 2027 is the year of Crimson Horse and Red Goat, the core effect will bloom on May 5th 2026, which is known as “Start of Summer”. Therefore, it is time for treasure hunting, that is to find the stars of tomorrow, and thus you can reap your harvest by the end of 2026 and 2027. That is why I said yesterday I have begun a personal investment project of 15 months. When you start your plan at the right time and auspicious time, it will be more fruitful.

How to pick up the stars of tomorrow. Please refer to the top 10 market capitalization, they should be the focus of investment currently, but how about the future? Can find out some stocks from the top 20 or even 25. Of course, people should ask for help from the AI in such a case. For MU and INTC, it may be too risky to chase high, but when we refer to the S&P, it has already refilled the jumping gap on April 17th, but NASDAQ not yet. So, for those that expect a healthy adjustment according to the Fibonacci series is correct, but it sometimes may not come. For those that are FOMO (Fear of missing out) can try META and MSFT and treat the drop as a chance for buying in.

There is one more traditional method of buying at low, that is to use the high of the price to the 250-SMA and minus that, when it falls into the same amount below the 250-SMA, it is a level of buying. The theory is based upon that most of the time, the US stock market is running above the 250-SMA, so when it is too far under, it is time for buying. However, this method needs some patience, for it will not go up at once. For aggressive buyers, you can try the INTC or GOOG, they will rocket up again at any time, but if you want to find a middle way, can try the ASML, AMD or TSM which already retreated a little. They have a chance to go up shortly and make a record high again, but must have a 2-handed preparation of either up or down. It also needs to beware of the sudden drop like NVDA.

So, it depends on your own plan, that is whether your plan is short-, medium- or long-term. A smart investor should include these 3 plans, just see how you allocate the ratio according to your current and future financial situations. **Anyway focus on top 10, prepare well on top 20, take action in right time of “Start of Summer”.**
