North East West South is NEWS

Iran's Revolutionary Guards warned that any ships deviating from the Strait of Hormuz, a shipping lane approved by Iran, would face a strong response.

The standard iPhone 17 topped the list of best-selling smartphones globally in the first quarter of 2026. Counterpoint Research indicated that the single model accounted for 6% of new smartphone sales worldwide. Apple's iPhone business also recorded significant year-on-year growth in the same quarter, showing that the standard version has taken over from the Pro series as the sales leader.

OpenAI is accelerating the development of its first AI agent smartphone, significantly advancing its mass production target from the original 2028 to the first half of 2027. Driving factors include aligning with its year-end IPO and increasingly fierce competition in the AI agent smartphone market.

Nvidia CEO Jensen Huang recently stated at the 2026 Milken Institute Global Summit that China should not acquire Nvidia's latest generation of chips in order to maintain the United States' leading advantage in the field of artificial intelligence. This statement reflects Nvidia's predicament: it hopes to re-enter the Chinese market, but must also comply with the US government's technology export controls on China.

According to *The Times* of the UK, Ukraine found evidence that Russian soldiers are eating dead human body in several locations and times, which is not single evidence. *The Sunday Times* got photos and proved are real photo and not generated by AI of cutting dead human legs. Some Russian officers already gave order that eating human body is not allowed.

“Start of Summer” can be seen in Stonehenge of the UK, but now only members of the Royal Astronomical Society can enter into that circle. General tourists cannot enter now.

The above chart is not oil price, but showing money are flowing out of oil market, part of them entered stock market.

Oil price dropped for Trump said peace talk has good progress, but later siad if Hormuz is not opened, stongest bombard will carry out at once.

A comparison since Aug 2025 to May 2026 of both.

World Observation

Day 1534
Russia/Ukraine Conflict

Kardashev Type II Civilization (Space AI)

The writer reiterated numerous times that all policies of Donald Trump needed to be up-date, up-hour, up-minute and up-second. He launched Project Freedom and halted the second day. Stock market rocket up firstly on launching out, later again rocket up on cancellation. Why? Simply because it is a typical bull market, no matter good news or bad news, the market has one way only, that is going up.

Trump had called back the F-35 fighters after their taking off both in January and March. Simply the evaluation while they were on air confirmed military power was not enough to achieve his target, so called back at once and have better preparation before the second round.

It is quite different from the 1979-81 Iranian hostage crisis that President Jimmy Carter called back the Delta Force due to series of unexpected incidents. There were 66 people in the American Embassy of Tehran caught by Iran. Jimmy Carter arranged a complex rescue project trying to save them. Six RH-53D *Bluebeard* helicopters carrying the Delta force to achieve the mission. But the bus carrying the force had an accident and made the taking off delayed for hours. On taking off, they found one helicopter was out of action due to the desert weather. Jimmy Carter still gave the order to take off at once with the remaining 5 helicopters. However, on half way, another helicopter was out of order again. Jimmy Carter found the force left was not enough to carry out the mission. Thus, called them back and cancelled the mission, but 2 helicopters crashed together due to sudden U-turn. Anyway, quite different from what Trump is doing. Readers can refer to *Operation Eagle Claw* of Wikipedia.

So now everything should go back to the side of the economy and put away the Middle East crisis to second or third places. Mind that the market sentiment goes back to the end of 2025, that is too many potential stocks needed to buy, but too little cash left in hand. So, we must aim at the next generation and not just next month or next year. What

will be the main trend of the next 2 decades? That is the *Kardashev Type II civilization (Space AI)*. This time the space project is not like the Apollo that ran for a few years only, it is a project of immigration to the Moon and Mars.

Apollo Project aims at defeating the Soviet Union, the Artemis project is not just to defeat China, but for the military purpose of occupying low earth orbit to space base on the Moon and Mars. A lot of countries are joining the competition. They are wanting to occupy the most favorable locations on the Moon and Mars, including China, EU, Russia, UAE, Japan, South Korea..... First come, first served!

Don't just look at rocket shooting stocks, but also their supporters like quantum computers and super computers, chips, foundry, anyway the whole chain of industry which is known as *Kardashev Type II civilization*. That is besides SpaceX still having Blue Origin and ARKX. Mind that Samsung is chasing up TSMC, and GOOG is chasing up NVDA. A new page has turned over on the Start of Summer (May 5th). Some people may ask, which one is higher, King of Kings or Lord of Lords? That depends on your view point. According to the Great British Empire, the King is highest and the Lord, the Count, the Knight are all under the King. But according to the Bible, the Lord above of course is over the King on earth. Anyway, they are running neck to neck.

AI is not a bubble, but AI stocks sometimes are really overestimated and need to have correction. However, the correction had not yet come. Don't guess the top, we better try some strategy to cope with the current situation. When you think stocks are too high and afraid of a sudden drop, you can enter into the ETF of indexes. Let's see nowadays, even indexes are breaking record high, some small potatoes of the market found their earnings are less and value inside their account is diminishing. Why? Because only some components rise and others are falling. Actually, it is a case of changing horses. So, when buying an ETF means would never buy a stock which falls while the market is going up. Can be in a ratio of 3 QQQ, 2 VOO and 1 DIA monthly. Or split it into 6 months, but need to have 3 rounds.

For the past 2 years, the stock market has gone up so fast which is in an abnormal status. The fall is so little and the rebound goes fast. The golden pit of April 2025 made a chance to buy at dip, but the golden pit of April 2026, is even shorter and shallower. Warren Buffett said the gambling air now is too strong, we better do something to lower the risk, but it's hard to wait for a drop of 2008 Financial Crisis or 2020 Covid.
