North East West South is NEWS

US President Donald Trump stated that he will have "long talks" with Chinese President Xi Jinping on the Iran issue during his visit to Beijing this week. He also indicated that the Russia-Ukraine war is nearing its end, believing that the two sides will reach a reconciliation, and vowed to rescue all Venezuelan political prisoners.

The nonpartisan Congressional Budget Office (CBO) estimates that President Trump's Golden Dome missile defense system plan could cost as much as \$1.2 trillion over the next 20 years. Trump announced an initial investment of \$25 billion in the project last May, stating that the final cost is estimated at \$175 billion.

One of Berkshire Hathaway's most recent acquisitions is in Domino's Pizza (DPZ). Berkshire currently holds approximately 3.35 million shares, representing about 9.9% of the company's equity. Motley Fool said that it would made you become a millionaire.

In pre-market trading on Wednesday, semiconductor, fiber optic network, and data storage stocks generally rose sharply, mainly driven by two positive factors: first, the global supply of memory chips continued to tighten; and second, Nvidia CEO Jensen Huang accompanied US President Donald Trump on a visit to China, which significantly boosted market confidence.

Billionaire hedge fund manager Paul Tudor Jones, who accurately predicted the 1987 "Black Monday" stock market crash, offered some insights in a CNBC interview this week. He believes the current rally is not yet over and could continue for another year or two; he also mentioned recently increasing his AI-related positions, but did not disclose which specific stocks or assets he bought.

This channel cannot make you rich, but aiming at your mental relaxing to re-charge your energy.

On Tuesday, 3 major indexes fell, but AAPL and NVDA on record high.

DPZ is the last stock that Warren Buffet purchased before retirement, and is said can made you become millionaire, best for those need copy trade.

Air Force One has insufficient first-class seats for 18 CEOs

NASDAQ is benefitted by rise of AI stocks or NVDA, TSLA and AAPL.

World Observation

Day	1541
Russia/Ukraine Conflict	

Refuelling of Air Force One

Focus of the market already turned from Hormuz to G2, and the G2 meeting suddenly turned focus on Jensen Huang. NVDA is now the largest company in the world, when Donald Trump flies to China with 17 CEOs for business, how can it be without Jensen Huang? Does it mean they are all second-class business? Suddenly, news said Jensen Huang joined the Air Force One trip in Alaska and flew with Elon Musk and Donald Trump to Beijing.

The refuelling in Anchorage or Fairbank of Alaska is a technical landing in the 1990s, since then Boeing had developed the SP (special performance) engine which can fly directly from Asia through the North Pole to the east coast of the US. Now all commercial flights from Beijing, Seoul and Tokyo can fly directly to New York and DC without technical landing in Alaska. The US president currently has two B747 of same design which had already been upgraded in the Bill Clinton and Barack Obama era. So, when one is for flying and another can be for maintenance. In the Iraqi War of 2003, George Bush flew from DC to California by Air Force One, and another Air Force One used to fly the Australian Prime Minister Howard to California to have the Victory Declaration aboard the Abraham Lincoln aircraft carrier. Just to show that US has a lot of allies beyond the UK.

Mind that in 2025, Qatar sent one 747 as a flying palace to Trump as a gift, but it needs to upgrade its safety and communication, and only can fly in 2028. This time, most of the CEOs fly on their own private plane, for the Air Force One does not have enough space for first-class seats for those CEOs.

What they need is not just a seat but an office in the air with their assistants. So only Elon Musk, Jensen Huang and Tim Cook can fly with Donald Trump.

In 2025 Jensen Huang is named as “Person of the Year” by *Times* magazine, and “Architect of AI”. He was born in Taiwan and moved to New York at the age of nine when he was unable to speak English. Later graduated from Stanford University. He is a supporter of Taiwan, and attended the graduation ceremony of National Taiwan University for most of the TSMC’s engineers are from that university. TSMC also had a lot of business with NVDA, and the downstream industries also supported TSMC very much. The CEO of AMD, called Mother So, is also one of his relatives in Taiwan. So, his pro-Taiwan background made China unhappy. This is the point.

Donald Trump does not want to rely too much on TSMC, so his target is to ask them to move 50% of their production to the US, but it aims at quantity only and not quality. According to the law of Taiwan, high technology production cannot be done outside, must be done locally. Therefore, now in the Arizona plant, they can only produce 5 nm chips, and from 2 nm to 1nm chips TSMC will only produce them inside Taiwan so as to protect intellectual property. Practically, Air Force One no need to have refuelling, but at the last moment Trump got the consent and asked Huang to fly to Alaska to join him. This is the fact. As Trump left on Tuesday afternoon, AAPL and NVDA made record highs before market closing.

One more point is that Marco Rubio is under the sanction of China twice and still can fly with Trump to China. White House released a photo on Air Force One that Rubio is putting on the Nike sportswear exactly as Venezuela president Maduro was captured in January. So, what is the purpose? Heaven knows! Readers just guess on your own and surely will be correct, for they would not give you another answer. Finally, mind the stocks that had record high on Tuesday while 3 major indexes fell, they are NVDA and AAPL.
