Day	1560
Russia/Ukraine Conflict	

Who is the real winner in Iranian War?

For the war in Iran, it is said that the progress of peace talks is quite nice and already 95% of the items are compromised and only 5% left. But please refer to the elaboration of AI on the next page. So many items not yet come to conclusion, how can they say 95% compromised, it should be 95% not yet compromised.

Is AI stupid or foolish? Is AI clever or smart? Hopefully, in the future the super AI will be better. Ai is not the winner!

How about the uranium, already said it would be diluted and shift to China for storage, and the density is said to be 7%, but in the era of Obama it is 3.75%, so the deal is even worse than before, can we say the US has won the war?

What Donald Trump really wants is that it shows that the US had really won the war, that is not to sign in Pakistan and want Iran to send people to Washington and sing in the Oval Office or White House. That is what he wants, and not the terms. Such as in the Iraqi war of 2003, George Bush announced victory on board of the Abraham Lincoln aircraft carrier in California. He flew from DC to California on his Air Force One, and sent another Air Force One flew to Australia to pick up Prime Minister Howard to fly to California in a joint announcement of victory, showing that the war was not fought by the US only but by the allies.

Trump believed that the oil production of Iran was overloaded on May 22 and not hard to persist on the anti-blockade, they have to destroy some oil and pour some into the sea besides transporting by train and pipeline outward.

When peace talk comes, the market rises, but when ceasefire agreement is broken, the market also rises. So the market is neglecting what is happening in Hormuz Strait, for the practical situation is that Iran can control the Strait even with 10% of the military force left or even lesser. The US has the power to bombard them back to the stone age, but they dare not to do so. For the price of oil would be quite high and need a long period to recover.

O my God, who is the winner?

So it is expected that the market will continue to rise and now we can hardly watch them to drop unless there is a chance to sell on good news. The hot trend of the IPO of SpaceX is blooming in the coming fortnight, and after that the trend may still continue for a certain period. The end of rate cut cycle and start of rate hike cycle normally is bad news for the market, but now people still buy on bad news and we have to observe when they will sell on good news.

It may take some time, normally the rising days of the US stocks market are more than falling days. So we better keep on watching and do not have short selling in such a case.

Can Iran said to be the winner? No ! No ! No ! Their supreme leader with 48 cabinet already killed on first strike, surely disqualified to be the winner.

So who is the real winner, it is you if you can catch the golden pit and earn in the war of Iran.

Donald Trump refused to sign the Iran peace deal because the last 5% of unresolved terms touched on the most sensitive issues: Iran’s nuclear program, sanctions relief, war reparations, and control of the Strait of Hormuz. These sticking points made the compromise politically and strategically unacceptable to Washington, despite progress on most other areas. CNBC +2

GPT-5 is here - OpenAI

Passed Turing Test as AGI (super AI) level

Why Trump Rejected the Deal

- Iran’s Counterproposal:** Tehran demanded war reparations, full sovereignty over the Strait of Hormuz, lifting of U.S. sanctions, and release of frozen assets. Trump labeled this “totally unacceptable.” CNBC
- Nuclear Program:** The U.S. insisted Iran dismantle enrichment sites and surrender its stockpile of highly enriched uranium. Iran instead offered to dilute uranium and transfer it to a third country, with a clause allowing return if Washington abandoned the deal. CNBC +1
- Regional Security:** Israel and U.S. officials stressed Iran had not curtailed support for proxies or halted its **ballistic missile program**, leaving major security concerns unresolved. CNBC
- Trump’s Position:** He publicly said the chance of a deal was “50-50” and threatened to “blow them to kingdom come” if talks failed. Bloomberg

Key Uncompromised Terms

Issue	Iran’s Position	U.S. Position	Result
Nuclear Program	Dilution & third-country storage, reversible	Permanent dismantling & removal	Deadlock
Sanctions	Full lifting + release of frozen assets	Conditional, phased relief	Deadlock
Hormuz Strait	Full sovereignty + toll rights	International oversight, U.S. escorting ships	Deadlock
War Reparations	Compensation for damages	Rejected outright	Deadlock
Regional Proxies	Continued support	Halt proxy funding	Deadlock

Outlook for Real Peace

- **Short-Term:** The ceasefire since April 7 holds, but without a signed deal, tensions remain high. Naval blockades and proxy conflicts could reignite hostilities.
- **Medium-Term:** If Iran moderates demands on reparations and nuclear guarantees, a framework deal is possible. U.S. negotiators hinted at **sanctions relief** if Iran makes “serious” concessions on nuclear material. International Busin...
- **Long-Term:** Real peace hinges on whether Iran accepts limits on its nuclear program and regional activities. Without this, Washington and allies (especially Israel) will resist any settlement.

Risks & Implications

- **Global Economy:** Continued uncertainty in the Strait of Hormuz keeps oil markets volatile, threatening energy security worldwide.
- **Regional Stability:** Proxy wars in Lebanon, Syria, and Yemen could flare if talks collapse.
- **Diplomatic Pressure:** China, Pakistan, and Turkey are mediating, but U.S.–Iran mistrust makes durable peace fragile.

 **Conclusion:** The “95% compromise” was real, but the unresolved 5% contained the *core strategic disputes*. Unless Iran softens on nuclear guarantees and sanctions relief, Trump is unlikely to sign. Peace remains possible but precarious, with the outlook closer to a fragile truce than a lasting settlement.
