North East West South is NEWS

Iran said it targeted US bases in Kuwait and Bahrain, as well as a vessel near the Strait of Hormuz. This came after the US military used a Hellfire missile to hit a Botswana-flagged oil tanker heading toward an Iranian port on Kharg Island.

The US military stated that it launched a "self-defense" strike against Iran, shooting down ballistic missiles and drones fired by Iran at ships and Gulf states.

At its Build 2026 developer conference, Microsoft CEO Satya Nadella personally unveiled the Surface RTX Spark Dev Box. This mini AI desktop computer, designed specifically for developers, features the RTX Spark SoC co-designed by Microsoft and NVIDIA. It aims to allow developers to perform large-scale AI model inference and fine-tuning training locally on their desktops, without relying on cloud GPU resources.

SpaceX's highly anticipated IPO, scheduled for as early as next week, has seen its valuation, previously predicted to exceed \$2 trillion, revised down to \$1.75 trillion, according to Bloomberg citing sources familiar with the matter. The public offering will represent less than 5% of the company's shares, valuing the company at approximately \$60 billion to \$80 billion—a significantly lower percentage than a typical IPO.

US President Trump is attempting to rebuild tariff barriers that were previously overturned by the US Supreme Court, including launching Section 301 investigations into up to 60 economies worldwide that have "failed to effectively enforce bans on the import of forced labor products," with plans to impose punitive tariffs of over 10% on the offending goods in the future.

MRVL

Everyone knows that MRVL will rise for 400%, it depends whether you have the *Kung Fu* to enter now.

AMD not yet refilled jumping gap, but already adjusted and digested.

NASDAQ is exhausting, going horizontally, but still in integral rising trend.

Market Observation

Unfavorable News Come at length

PHLX
Semiconductor
17,861.32
USD ▲ +276.73
(+1.57%)

Stock market reached bottom on March 30 and started a rebound till now. There is no prominent adjustment, and investors are waiting for a healthy correction so as to digest the buying orders and re-generate new energy for another round of bull market. Unfavourable news arrived at length and 3 major indexes had different responses to them. DJIA fell, NASDAQ and S&P mixed, but the 4th index, PHLX, is still going up.

The main reason is due the fragile ceasefire in Iran reignites fighting. Oil prices were lowest last Friday, but Trump refused to sign the agreement which was already put on the desk of the Oval Office. Please be noticed that the White House now is just a residence, meeting place and announcement hall of the president, his daily work is done in his Oval Office which is by the side of White House. WTI touched bottom of Bollinger Bands and then went up little by little above the Ichimoku green cloud. Stochastic Slow shows an upward signal, and MACD showing a changing point is near. However, it is still under the \$100 psychological barrier.

Ukraine also started another round of drone attacks in St Petersburg where Putin is having his Davos Forum. What people are afraid of is the rate cut cycle will end and aroused inflation thus led to the defeat in the midterm election of Republicans. Actually, the ruling party will lose some seats in the Congress in the midterm election, but we have to know how the situation is.

For rate cut cycle, the CME target rate shown that there would be a change in the Jan 2027 FOMC meeting, the rate of keeping interest rate unchanged is 35.2% and increase interest rate is 41.6%, but please mind also the Dec 2026 meeting, such a rate is just 41.8% to 41.5%. We still have half a year to go; it is hard to say what will happen in Dec 2026 and Jan 2027. Anyway, the trend

is changing from rate cut to rate hike, it is somewhat unavoidable, just see when will it be done!

The hottest trend in the market recently is surely the IPO of SPCX. Its valuation has shrunken from \$2 Trillion to \$1.75 trillion. It made the market a little disappointed, but if we can have a review, at first, it was said to be \$1 trillion only, and later \$1.25, \$1.50, \$1.75, \$2.0 and now just turned back to \$1.75, it is still quite high indeed. No need to worry so much. According to the ranking of today, it will rank no 8, just after the TSMC. Still a record that the first day will be among the Top 10 of the world. Hurray! Hurrah!

Mind that AVGO had already chased up TSMC and surpassed it. I have already noticed it in the Teaching Video 2 of the year 2022. Anyway, the focus of the money market of the world is on Wall Street, so do not try other places, nowhere but Wall Street. It is a concentration of money. If you want to use money to re-create money, it is nowhere but Wall Street. I always remind investors to note one point, India had a population of 1.5 billion and China 1.4 billion, they could not generate a company among the top 20 market capitalization. These 2 countries are the largest countries in population still could not do this, what we should aim at is money and not people.

Mind that APPL is now in second place again, overtaking GOOG and MU is still running upward even the NASDAQ retreats. MRVL continues to rise up with no adjustment. All the world knows that it would rise 400%, just see how dare you enter into the market at such a level. Take Care! Beware of heart disease for those that chase high. I am unable to say it won't rise, I am unable to say against Jensen Huang, only can say beware of heart disease! For those that wish to chase high can try the AMD of Mother Su, it has not yet refilled the jumping gap, but stopped for a while for digestion.

Trading US stocks needs some *Kung Fu*, this *Kung Fu* does not mean fighting or martial art, it means the inward nourishment to face adversity and generation of endurance and enlightenment due to experience.
