Why WTI is called light sweet crude? For they say the taste is sweet, but inflation it brings is bitter.

*Risk disclosure: Price can go up and down at any moment, use free money to trade and bear the risk according to your own capital;
Never trade with money that has a deadline for withdrawal.*

All suggestions are for reference only, even AI cannot be 100% reliable, final decision still lies upon investors.

Copy trading cannot replicate another trader's background or psychological state.

KOSPI at first had an historical record of 2 circuit breakers consecutively, than on Friday had the largest single day rise ever to Stop High.

North East West South is NEWS

Tesla has recently been rumored to be planning to spin off its China business, reportedly hoping to remove regulatory hurdles and pave the way for a future merger with aerospace technology company SpaceX. Tesla China has officially clarified that the reports of a business spin-off and merger with SpaceX are completely untrue, reiterating that operations in the Chinese market are proceeding normally.

Google, a subsidiary of US tech giant Alphabet, removed a new feature from Google Earth that allowed users to generate AI visual effects on satellite imagery. This sparked strong backlash from researchers and open-source intelligence experts, who expressed concerns that it could become a breeding ground for misinformation.

After an influx of migrants into Ceuta, Spain's North African enclave, prompted Italy to temporarily close its border with Spain, Spain stated today that the integrity of the Schengen Area will be "absolutely guaranteed."

UN Secretary-General Antonio Guterres warned that El Niño, a potentially record-breaking phenomenon, is intensifying, with Pacific Ocean waters affecting El Niño reaching unprecedented temperatures at such an early time. The latest forecast from the World Meteorological Organization (WMO) shows that the current average sea surface temperature is already 3 degrees Celsius above normal.

US President Donald Trump said he agreed to cancel strikes against Iran, provided a "quick" agreement is reached with Iran.

The Fly or Die situation of last week after breaking baseline of Descending Triangle, issued MAYDAY call, But found support at 250-SMA and proved it can fly up now.

Even it is by the end of a Symmetrical Triangle, but closed above all 5 average lines. That means future is 51% in Bull Market.

The rising trend is still integral, but exhausting, again closed above all 5 major average line, future sit at 51% in Bull Market.

It has gone back to the level of Hunter Moon of November 2025, where started the trend of nice financial reports but prices gone down.

World Observation

Day 1622
Russia/Ukraine Conflict

Incessant Chaos

While the **El Niño–Southern Oscillation (ENSO)** symptom led the world in hot waves including Europe, North America and Asia, and is extending to other parts of the world even the World Cup Soccer is affected, another wave of illegal immigrants occurred in Spain. It aroused great disputes that under the DEI slogan of Diversity, Love and Inclusion, advanced economies should accept them. But the most controversial point is that no one should jump the queue. Legal immigrants applied for years and were still waiting, but illegal immigrants with the help of black society entered without permission. Thus, social orders are disrupted and sources cannot allocate fairly and rightly to the needs. The GDP growth rate in the EU is quite weak, in Q1 is -0.2% and Q2 +0.4%. So, is it worthy to take care of illegal arrivals?

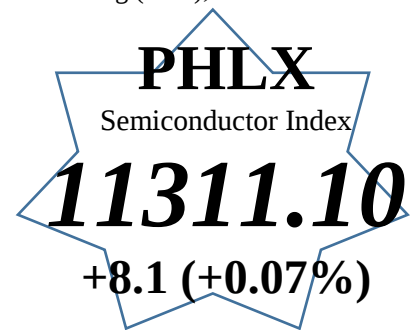

In the 1980s, boatmen from Vietnam entered Hong Kong and shocked the world, at first, we accepted but later overloaded and had to send back. Now application for immigration to the US must be done overseas before arrival which means cannot accept illegal arrival first and then application later or else it will only make black society rich for arrangement and immigrants risk their lives to uncertainties.

Again, in Iran, as the writer said, the policies of Donald Trump needed to be up-date, up-hour, up-minute and up-second. The MOU with Iran is interrupted, and ready to bombard them back to the Stone Age, and just said ready to talk. He is cancelling planned attacks. The financial market has just recovered from the slump of memory in Korea, but has to face another attack by Trump and is now cancelled. But terror attacks in the Middle East of the Consulate and Ambassadors are in high danger now. In January and February, he had ordered the F-35 to fly up but called them back at once in mid-sky after evaluation. Have you ever seen a US president do such things? Not even in Hollywood movies! Therefore, happenings in the Middle East are extremely unpredictable, we still have to up-date, up-hour, up-minute and up-second.

Market Observation

God of AI stocks

Leopold Aschenbrenner of Situational Awareness won 1.4 trillion dollars in Q1 of 2026, the speed is faster than Warren Buffett (God of Stocks) and George Soros (Defeater of G7 Central Banks). But he had a total loss on Thursday. His earnings could not be used as wedding gift, but on his wedding day he had to apologize and promised not to borrow money for trading again. He won a beautiful wife but lost all his money.

Those who studied in business college would learn of the term Risk Control in freshman year, it is quite simple to memorize the definition but hard to carry out. Let's see even the God of AI stocks met his Waterloo in this field. For details, please refer to my YouTube video.

Let's look at the 3 major indexes. DJIA just retreated from the highest point and is still the strongest, it represents non-AI stocks that are quite firm now. S&P is right in the mid-way, but just jumped above all 5 major averages lines, 51% looking good. NASDAQ was in a Fly or Die situation last week, and now had a pullback up the baseline. The MAYDAY call was helpful and successful. It does not mean, it would rocket up at once, but already kept away from the dip of falling. To sum the three, it is still 51% looking good.

How about the current trading, it is said to be the battle of Citadel against Michael Burry. It was said that Aschenbrenner was just half an hour away from resurrection. That is half an hour after his liquidation, all stocks recovered and rocketed up. His margin was not enough to persist 30 minutes more. Anyway, risk control cannot be taught in college, it needs on-the-job training or on-the-trading training. That is experience! Would all traders stay near senior or experienced traders for final victory! Waterloo is Waterloo! Margin trading can make you on the side of Wellington or Napoleon Bonaparte. Risk Control is above all EMBA degrees. Michael Burry and Leopold Aschenbrenner are professional traders, retailer traders should not follow them! Please!
